PROFESSIONAL SUMMARY

Enthusiastic **web developer** eager to contribute to team success through hard work, attention to detail and excellent organizational skills. Clear understanding of **Task** and training in **Python, Django, React js**. Motivated to learn, grow and excel in **IT Industry**

SKILLS

- Communications
- Relationship development
- Process improvement
- Django/Python
- Python
- React

EDUCATION

Leaders Education

Kozhikode • 05/2020

Bachelor of Computer Applications

NIIT

Kozhikode • 01/2020

Diploma in Full Stack

Web development(REACT js, Angular js)

WORK HISTORY

Projects

Title	: Human Resource Management
Client	: Various
Skills	: Python, Django , BOOTSTRAP, Java script, CSS, HTML
Responsibility	: Design , coding
Technology	: Python, Django , MVT

This is a Business Application developed for managing Human Resources of any company with any size of employees. It allows a company to keep track of all of its employees and information about them—whatever information the company chooses to store there, such as employee demographics, benefits tracking, and performance information

Latest version of Python (3.7.6) and Django(3.0.7) with MVT architecture is used for developing the application. The application is

Hosted on python cloud (<https://www.pythonanywhere.com/>) for test purpose. There are number of modules in this project

Modules:

User Master
Role Master
Employee Master
Designation Master
Salary Master
Attendance Management
Holiday Calendar
Leave Management
Salary Advances

Employee Master is to update and upload employee details
And add employee details too.

Designation Master is where we update all the roles of an employee

Or if any employee gets an promotion

The calculations of salary and salary advances occupied by employees

Is all done in salary master module

Attendance Master is often linked to the time and attendance and workforce management functions

Leave Management module is an automated way to allocate, book, approve, track and monitor any absence from the workplace. It may be for vacations, compassionate reasons, illness, parental leave, even jury duty. Request and approval processes should be streamlined and the outcomes incorporated into team calendars where appropriate.

Holiday Calendar form helps in managing Holiday details such as Holiday date, holiday description, holiday reason, etc.. Holiday lists can thus be maintained for different regions or countries if the holidays differ.

In many companies, the HR department faces a dilemma. HR managers truly want to improve the overall work environment for employees, but most of the time they need to deal with paperwork and routine administrative tasks like processing employee information and answering questions. To address these routine tasks, companies can use a Human Resource Management System & HRMS have bright future in India.

ACADAMIC PROJECTS

Title : E-commerce online shopping site

Client : Various

Skills : React js with redux components, Node js,
Java script ,HTML,CSS

Responsibility : Design and coding

This is an E-commerce application developed for
Online shopping

Latest version of react js 16.8 is used build this
application

Hosted on Heroku (<http://crwn-inlive.herokuapp.com>)
